

IntroRedis2

Tom Bohbot

April 2021

- 1 Reset the Redis server to “initial state” for your database..

A terminal window with a dark background. The prompt is 1617973669.459042 [0 127.0.0.1:56914]. The command entered is "FLUSHALL".

```
1617973669.459042 [0 127.0.0.1:56914] "FLUSHALL"
```

Figure 1: Resetting server

2 Post articles, and print the (augmented) “article state” to the terminal.

```
To see the code snippets after each step please see the source code. It would be redundant to post snippets here as well.

1) Reset the Redis server to “initial state” for your database.

2) Post the following articles in this order:
3) As you post each of these articles, print the (augmented) “article state” to the terminal:
/Users/tombohbot/TomsGit/BohbotTom/ModernDataManagement/assignments/IntroRedis2/IntroRedis2.py:23: DeprecationWarning: Redis.hmset() is deprecated. Use Redis.hset() instead.
  r.hmset(str(count), {
